CHAPTER 8 SUPPLIES

Your preferred provider for traffic and site safety equipment....

WHY CHOOSE US?

Chapter 8 Supplies delves into the essentials of sourcing and managing supplies—everything from establishing strong relationships with suppliers to maintaining an inventory that aligns with your growth strategy. We'll explore how strategic decisions around supplies not only streamline operations but also enhance your brand's reputation.

Preface

Welcome to our comprehensive guide to superior traffic management and site safety solutions. Established in 2004, we have dedicated over two decades to pioneering and refining the highest quality Chapter 8 equipment, serving groundwork contractors, drainage companies, utility services, and event organisers. Our commitment to excellence has enabled us to become a trusted name in the industry, synonymous with reliability, compliance, and durability.

In an industry where the safety of your team and the public is paramount, we understand the critical importance of dependable safety equipment. Whether you require barriers, cones, road lamps, or signs, our extensive product range is designed to meet the rigorous demands of modern worksites. Each product we offer is meticulously engineered to ensure maximum visibility, durability, and compliance with the highest safety standards.

This brochure aims to provide you with a detailed overview of our offerings and their specific benefits. Our goal is not just to supply you with products but to partner with you in creating a safer, more efficient work environment. By choosing our solutions, you are investing in the assurance of quality, trust, and peace of mind.

Thank you for considering us as your preferred provider for traffic and site safety equipment. We are confident that our products will exceed your expectations and provide you with the reliable safety solutions you need.

Sincerely,

Steve Ashton

About Us

Established in 2004, we have been at the forefront of providing specialised Chapter 8 equipment for groundwork contractors, drainage companies, utility services, and event organisers.

Over the past two decades, our unwavering commitment to quality and safety has made us a leading supplier in the industry, trusted by professionals who demand the best.

At our core, we believe that safety and reliability should never be compromised. This philosophy drives our continuous pursuit of innovation and excellence in the products we offer. Our extensive range includes traffic barriers, cones, road lamps, road signs, and cone signs, all designed to meet the highest standards of durability, visibility, and regulatory compliance.

We take pride in our ability to cater to the unique needs of various industries. Whether it's a construction site, a public event, or utility works, our equipment ensures optimal safety and traffic management, reducing risks and enhancing operational efficiency. Each product undergoes rigorous testing and quality control to ensure it performs flawlessly under the toughest conditions.

Our expertise isn't just in the products we distribute; it's also in the relationships we build. We value every client, striving to provide superior customer service, personalized solutions, and support that extends beyond the point of sale. Our dedicated team of professionals is always ready to assist you in choosing the right products and ensuring they meet your specific requirements.

“Our goal is not just to supply you with products but to partner with you in creating a safer, more efficient work environment.”

Thank you for considering us as your trusted partner in traffic management and site safety. Together, we can create safer environments and more efficient operations, driving success in all your projects.

Accessories

Weight: 0.05KG

Sealbrite™ Sleeve for Dominator™ 75cm Traffic Cone

Barriers

02.

Titan® 2M Traffic Barrier

The Titan® is the recognised and well established stacking barrier, it has all the usual advantages of standard stackable systems but in addition has many unique features. Titan® has undergone modifications to further improve longevity and to meet the proposed NRSWA changes effecting wind stability, setout in BS8442 when erected and assembled correctly.

One Piece Mould

The Titan® has been modified to a one-piece injection moulded design made from prime grade virgin Polypropylene offering sub-zero temperature and 2 year colour fastness properties. The new design is 100% metal free and fully recyclable.

Anti-Trip Feet

The Titan® has the option of having Anti trip feet which has a new scalloped design to prevent pedestrian/worker accidents. They are also painted in a high visibility yellow and featuring two reflectors per foot for extra visibility in low light situations.

Stability

We carry out a 'Balance Point' test on many competitors' barriers to assess stability. Our system compares very favourably with all plastic barriers of this style and weight. The balance point of the Titan® is 45°, any angle below this and the barrier will move back to the upright position.

Contractor Branding

There is a large area to allow contractor branding details to be hot-foil or embossed. The one-piece mould can be made in any colour and a three-piece version can be made with different coloured end pieces to match a corporate identity. Even the feet can be coloured to suit.

Titan® 2m Injection Moulded Road Traffic Barrier - Red

Barriers

The PROFESSIONAL barrier is distinctive yet designed to fit in with other barrier models visually and physically.

In standard ORANGE with revised pin and eye system it will fit seamlessly into most site set ups.

It also boasts our revised, proven foot, class leading spigot which are to be virtually unbreakable under normal field use.

New lifting handles make moving and linking easier, new lugs improve stack ability and the small surface area to

increase wind performance.

With a 96.5% recycled option, re cycling identification icons, and large embossed brand area, we think the new

PROFESSIONAL BARRIER has your company name all over it!

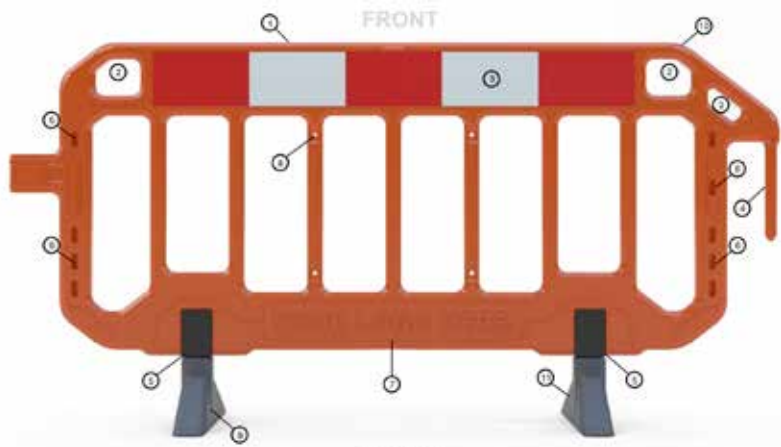

KEY SPECS:

Tot W = 11.2 kg

Wind @ 11.2kg = 19.51mph (Cat C = 19.5mph)

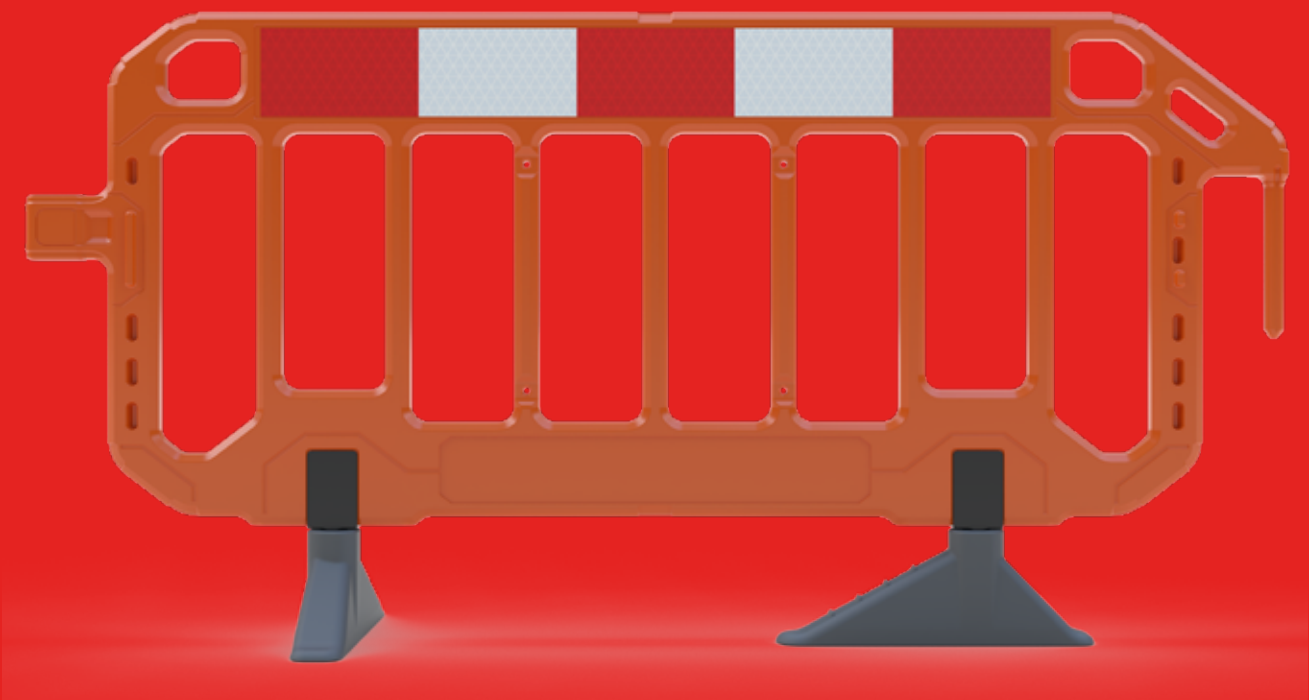

Different colours available

Features

1. Aerodynamic Shape. 2. Lifting Handles. 3. Durable New Reflective. 4. Universal Pin. 5. Unbreakable Spigot.
6. Reinforced Strapping Area. 7. Large Embossed Brand Area. 8. Permit Sign Holes. 9. Removable Anti Trip Foot. 10. Anti Split Pinch Edges. 11. Sandbag Grippers.

Firmus Group new Chapter 8 Barrier!

Barriers

Portagate® 3 Gate Compact Barrier System

The Portagate® is a blow moulded high density polyethylene barrier, supplied as a 3 or 4 gate system. Light and compact, the Portagate® is designed to meet communications industry requirements and enables increased quantities per vehicle.

Configurations

Adjoining clips allow multi-positioning configurations to be formed such as a triangle, a square or a single line.

Firm hold

By sliding the top hinge clip down panels can be locked securely into formations.

Stability

Designed to accept anti-trip feet for increase stability.

Temporary signage

Recesses are included for toggle mounted courtesy signs to enable the system to be fully closed with the signs still attached.

Reflective panels

Class R1 reflective panels which are 20% more reflective than standard lower grade reflective material conforming to BS 8442.

Contractor Branding

There is a large area to allow contractor branding details to be hot-foil or embossed. The one-piece mould can be made in any colour and a three-piece version can be made with different coloured end pieces to match a corporate identity. Even the feet can be coloured to suit.

Portagate® 3 Gate Compact Barrier System

Barriers

AlphaBloc® 1m Folding Traffic Separator

A-Game Stability And Storage

The uniquely foldable AlphaBloc® space saving traffic separator barrier system has been developed as a convenient alternative to the conventional style of water filled separators, allowing increased quantities on a pallet at less stacking height.

Small But Mighty

Can hold 1 tonne in weight! - The A frame design does not compromise this barriers strength!

Storage and Distribution

Increased pallet quantity at a total of 40, which reduces storage capacity and aids distribution. Design enables a contractor to half the cost of storage and transport, reducing their carbon footprint.

Increased Stability

Water fillable to increase ballast/weight for added stability.

Configuration

Acute angled bloc design allows for multiple configurations on both flat and uneven surfaces.

Corporate Branding

Large 180mm x 110mm plate area enables contractor details to be embossed and highlighted, whilst also acting as a pilferage deterrent.

Five Colours

Blue, Green, Red, White & Yellow

AlphaBloc® 1m Folding Traffic Separator

Kerb Ramps

03.

Supagrip Curb Ramp for Wheelchairs or Pedestrian Access

PLEASE NOTE: Many people purchase this for private use to carry in the car. This is 760x1282mm in size, so this may be too large to carry in some vehicles. Please be aware of its dimensions before ordering.

The Supagrip Safe Kerb is a development of the original Safe Kerb. It offers all the same features however it can support 350kg rather than the standard 250kg. It also has a rubberised edge so that it grips the kerb much better than the original. The Supagrip is a great choice if you have found the standard one slides around under foot.

Extremely high strength to weight ratio - weighs only 10kg but can support 350kg!

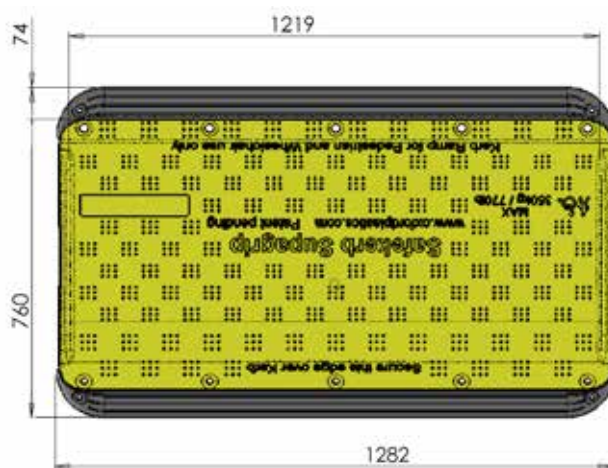

Approvals for the Supagrip Safe Kerb

The Safe Kerb wheelchair ramp complies and exceeds the following standards.

Wheel Chair Boarding Ramp Specification.

Safety at Street Works, Code of Practice.

Disability Discrimination Act.

If you require more information on this range you can get in touch with our sales team who will be able to talk you through any requirements or offer a site visit from the manufacturers if required.

Supagrip SafeKerb - Wheelchair Kerb Curb Ramp

Low Pro Boards

Lightweight, composite trench cover for pedestrians and 1.6T vehicles over a 700mm excavation.

HAUC compliant Footway Board. Alternative to steel plates and plywood boards, not for use in the roadway.

Easy-to-use

No bolts required in most applications, simply place over the excavation.

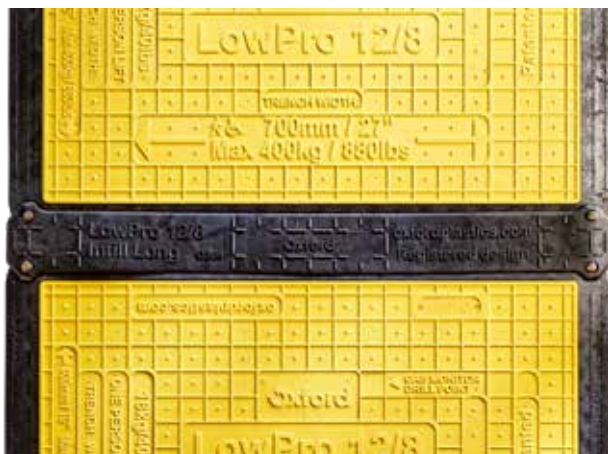

No heavy lifting equipment needed, install by hand.

No cold patch or asphalt ramps needed, use the LowPro ramp attachments to create an accessible platform.

Fits easily in the back of a works vehicle
Instructions for use are moulded into the anti-slip surface

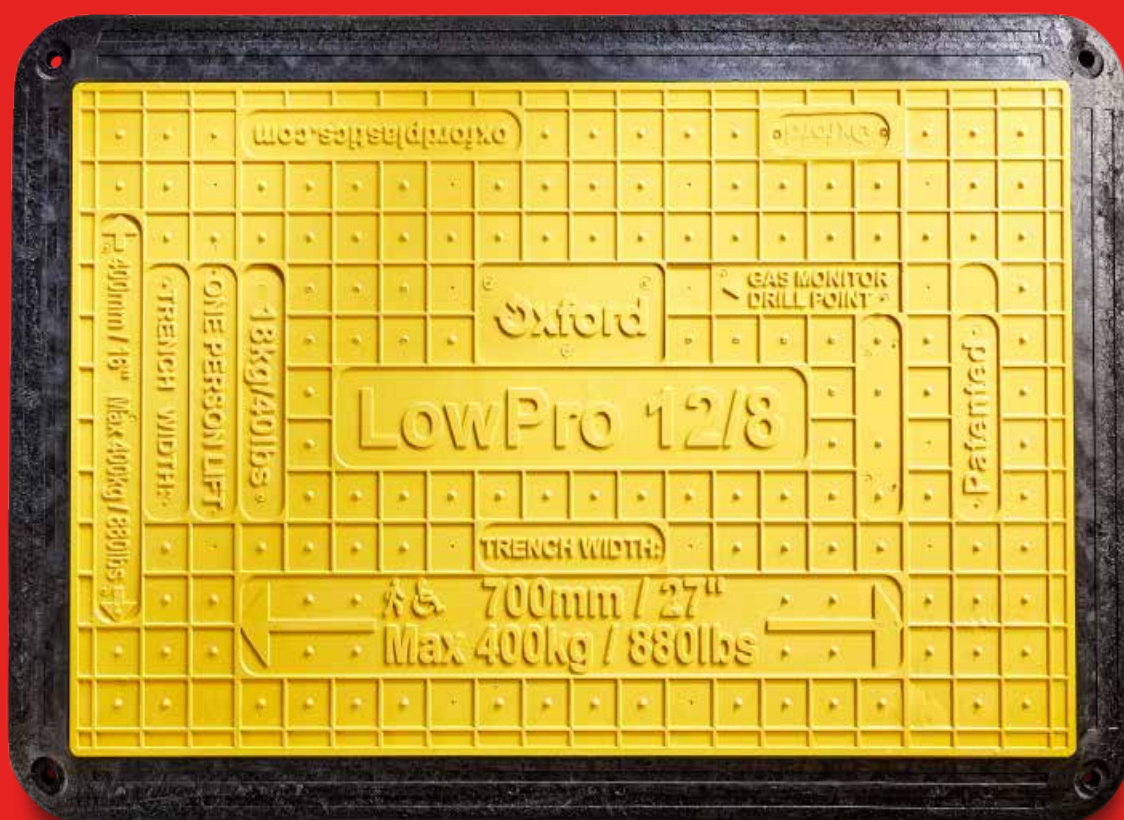

System Components

The LowPro 12/8 is a modular system of linking pedestrian trench covers, comprising the trench cover and 2 sizes of infill strips.

If you require more information on this range you can get in touch with our sales team who will be able to talk you through any requirements or offer a site visit from the manufacturers if required.

LowPro® 12/8 Trench Cover System

Low Pro Boards

Lightweight, composite trench cover for pedestrians and 3.5t vehicles over a 900mm excavation. HAUC compliant Driveway Board. Alternative to steel plates.

Easy-to-use

No bolts required in most applications, simply place over the excavation.

No heavy lifting equipment needed, install by hand.

No cold patch or asphalt ramps needed, use the LowPro ramp attachments to create an accessible platform.

Fits easily in the back of a works vehicle
Instructions for use are moulded into the anti-slip surface

System Components

The LowPro 15/10 is a modular system of linking trench covers, comprising the trench cover, infill strips and ramps.

If you require more information on this range you can get in touch with our sales team who will be able to talk you through any requirements or offer a site visit from the manufacturers if required.

LowPro® 15/10 Trench Cover System

Low Pro Boards

Composite trench cover for pedestrians and 2T vehicles over a 700mm excavation. Must be bolted to the ground. HAUC compliant Footway Board. Alternative to steel plates.

12/8 Safe Cover

Easy-to-use

No bolts required in most applications, simply place over the excavation.

No heavy lifting equipment needed, install by hand.

No cold patch or asphalt ramps needed, use the LowPro ramp attachments to create an accessible platform.

Fits easily in the back of a works vehicle
Instructions for use are moulded into the anti-slip surface

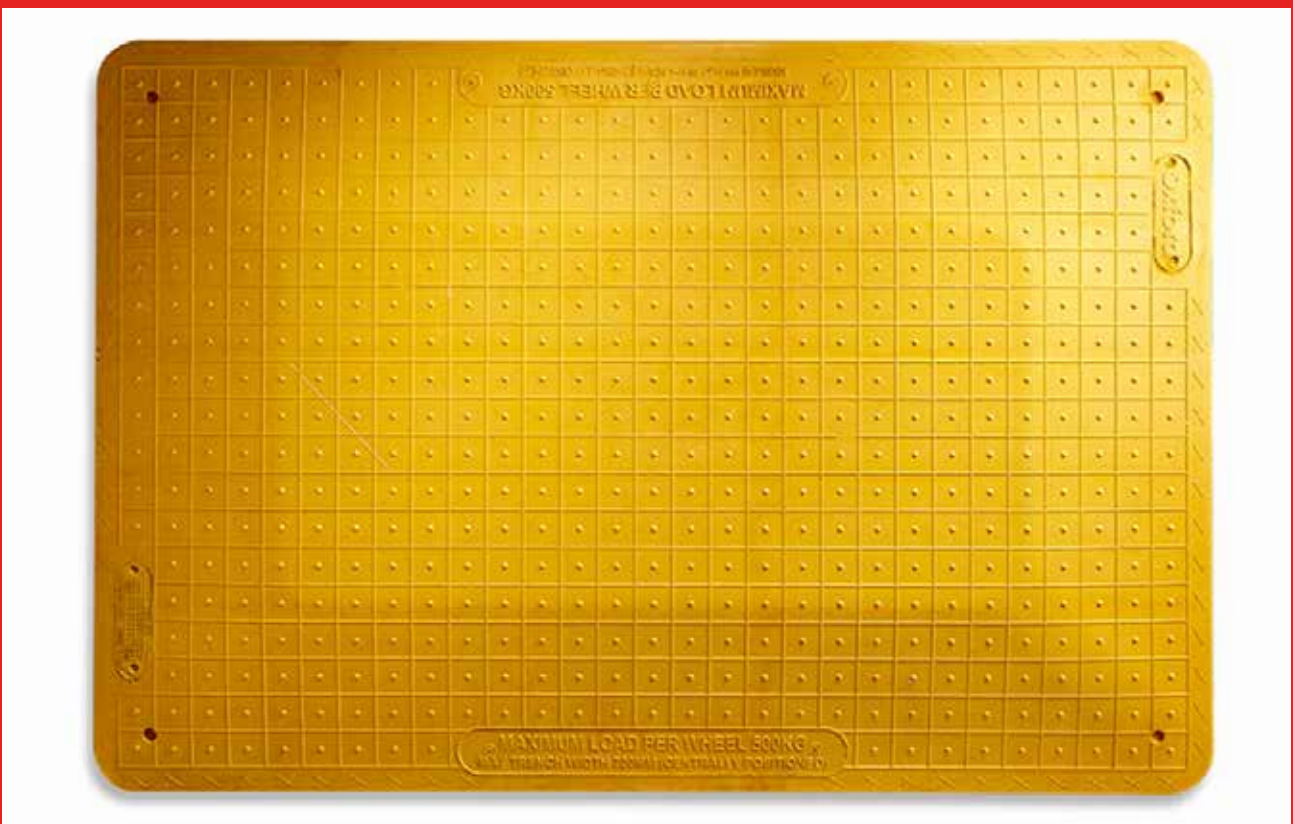

System Components

Our 12/8 Safe Cover trench covers create a safe and secure temporary trench cover for short-term or permanent solutions. Find out more about the right trench cover for you from our helpful downloads, or visit our road plates and trench covers section for more products.

If you require more information on this range you can get in touch with our sales team who will be able to talk you through any requirements or offer a site visit from the manufacturers if required.

Road Lamps | 05.

Site Safety Lamp – Side Mount

These versatile lamps can be set to flashing or steady operation, and are available with white, amber and red lenses.

Site Safety Lamps require little to no maintenance and each one is supplied with its own security tool. Each lamp is rated for up to 1,500 hours performance on 2 x AA alkaline batteries.

Our Site Safety Lamps are designed to withstand a tough working environment. All parts are impact-resistant and built ruggedly. The hard-wearing design of these lamps makes them an ideal choice for construction sites, where accidental impacts are a common hazard. Units are sealed against dust and water (IP54), providing protection from weather and airborne particles.

120mm x 118mm x 95mm

Side Mount

It's quick and easy to fit Site Safety Lamps throughout your workplace. These site lamps are tough, long-lasting and easy to install in a range of working environments. They are suitable for all scaffolding, skip lugs, HERAS fencing and roadside barriers, as well as bolting onto flat surfaces.

Available in red, orange or white

Site Safety Lamp – Side Mount

Road Lamps

Cone Safety Lamp

Our LED Cone Lamps have been designed with special consideration for cost-efficiency and low maintenance; these Safety Lamps come fitted with an integrated photocell switch for energy saving during daylight hours. The 360 Degree amber lenses provide maximum visibility for up to 1500 Hours, from just two standard AA alkaline batteries. Their durable design will withstand harsh environments and all parts are impact resistant.

Size:

175mm x 65mm

Uses:

2 x AA alkaline batteries (not included) Integrated Photocell with alternate on/off Flashing or Steady Settings

Site Lighting

Robust and secure cone lamp, ideal for urban roadside applications
The Cone Safety Lamps are inserted from the top, using a rubber collar for increased grip, to fit entry holes from 28mm up to 46mm in diameter.

Robust polycarbonate suitable for industrial applications
360 Degree polycarbonate lenses for maximum visibility
Fully compatible with the majority of traffic cones.

Cone Signs

Footpath Closed Ahead' Cone Sign (Cone Sold Separately)

Please note: Please note that the cone is sold separately.

This simple, yet important sign should be used to warn pedestrians on the footpath that the pavement they are using is closed further along. This can be due to works taking place on or near the footpath, or for another reason. The exact term reads FOOTPATH CLOSED AHEAD. This design complies with Chapter 8 standard.

The sign face is 600 x 450, and is compatible with 1000mm and 750mm cones (commonly seen on 750mm cones), making the product convenient and easy to deploy wherever needed. It is constructed from a scratch resistant face combined with a nylon woven tear-resistant strap.
